FINAL B.D.S. DEGREE EXAMINATION.
(Modified Regulations)
Paper III — ORAL MEDICINE (Oral Diagnosis) AND RADIOLOGY

Time: Three hours
Two and a half hours for Sec. A & Sec. B
Maximum: 100 marks
Sec. A & Sec. B: 70 marks
Section C: 30 marks

Answer Sections A and B in the same Answer Book.
Answer Section C in the Answer Sheet provided.

SECTION A — (2 × 15 = 30 marks)

1. What are the keratinizing lesions of the oral cavity? Write about oral leukoplakia.

2. What are the Radiation Hazards and write about the protective measures to be taken by the operator and the patient.

SECTION B — (8 × 5 = 40 marks)

3. Write short notes on:
   (a) Xerostomia.
   (b) Exfoliative cytology.
   (c) Amelogenesis imperfecta.
   (d) Intensifying screens.
   (e) Geographical tongue.
   (f) Herpes zoster.
   (g) Grids.
   (h) Grinspan's syndrome.
3. Write short notes on:
(a) Diagnostic property of X-rays
(b) Radio-opaque landmarks of maxilla
(c) Periapical osteofibrosis
(d) Filters and collimators
(e) Oral manifestations of secondary syphilis
(f) Treatment plan of erosive lichen planus
(g) Plummer Vinson syndrome
(h) Sialadenosis.

SECTION A — (2 x 15 = 30 marks)

1. Classify vesiculobullous and ulcerative lesions of the oral cavity. Describe the etiology, clinical features and treatment of recurrent aphthous stomatitis.

2. Classify the cysts of the jaw. Describe the clinical and radiographic features of "Dental Cysts".
FINAL B.D.S. DEGREE EXAMINATION.
(Modified Regulations)

Paper III — ORAL MEDICINE (ORAL DIAGNOSIS)
AND RADIOLOGY

Time: Three hours
Two and a half hours
for Sec. A & Sec. B

Maximum: 100 marks
Sec. A & Sec. B: 70 marks
Section C: 30 marks

Answer Sections A and B in the SAME Answer Book.

Answer Section C in the Answer Sheet provided.

SECTION A — (2 × 15 = 30 marks)

1. Discuss the role of radiography in the diagnosis and management of periodontal disease.

2. Discuss the differential diagnosis of Cervical lymph node enlargement.

SECTION B — (8 × 5 = 40 marks)

3. Write short notes on:
   (a) Bitewing radiograph
   (b) Dusimetry
   (c) Radiographic features of Osteomyelitis
   (d) Behcet's syndrome
   (e) Pulp polyp
   (f) Trismus
   (g) Geographic tongue
   (h) Laboratory diagnosis of HIV infection.

2
FINAL B.D.S. DEGREE EXAMINATION.
(Modified Regulations)
Paper III — ORAL MEDICINE (ORAL DIAGNOSIS)
AND RADIOLOGY

Time: Three hours
Maximum: 100 marks
Two and a half hours
for Sec. A and Sec. B
Sec. A & Sec. B: 70 marks
Section C: 30 marks

Answer Sections A and B in the SAME Answer Book.
Answer Section C in the Answer Sheet provided.

SECTION A — \(2 \times 15 = 30\) marks

1. Describe the construction and working of the X-ray tube. Add a note on collimation.

2. Classify Temporomandibular joint disorders. Discuss the management of TMJ arthritis.

SECTION B — \(8 \times 5 = 40\) marks

3. Write short notes on:
   (a) Bisecting angle technique
   (b) Grid
   (c) Automatic processing

(d) TNM staging
(e) Glossodynia
(f) Dental considerations in Asthmatic patients
(g) Herpes zoster
(h) Laboratory diagnosis of Diabetes mellitus.
FINAL B.D.S. DEGREE EXAMINATION.

(Modified Regulations)

Paper III — ORAL MEDICINE (ORAL DIAGNOSIS) AND RADIOLOGY

Time: Three hours

Sec. A & B: Two hours and forty minutes

Section C: Twenty minutes

Maximum: 100 marks

Sec. A & B: 80 marks

Section C: 20 marks

Answer Section A and B in the SAME Answer Book.

Answer Section C in the Answer Sheet provided.

Answer ALL questions.

SECTION A — (2 x 15 = 30 marks)

1. Classify and write briefly on the clinical features, investigations and treatment of oral candidiasis. (15)

2. Write in detail about the composition and actions of developer and fixer used in dental radiography. (15)

SECTION B — (10 x 5 = 50 marks)

3. Write short notes on:

(a) Necrotizing sialometaplasia

(b) Oral hairy leukoplakia

(c) Xerostomia

(d) Sialolithiasis

(e) Diagnosis and management of Tic douloureux

(f) Plummer-Vinson syndrome

(g) Filters and collimators

(h) Bisecting angle technique

(i) Automatic film processing

(j) Multilocular radiolucencies of jaw bones.
FINAL B.D.S. DEGREE EXAMINATION.
(Modified Regulations)
Paper III — ORAL MEDICINE (ORAL DIAGNOSIS) AND RADIOLOGY

Time: Three hours Maximum: 100 marks
Sec. A & B: Two hours and Sec. A & B: 80 marks forty minutes
Section C: Twenty minutes Section C: 20 marks

Answer Sections A and B in the SAME Answer Book.
Answer Section C in the answer sheet provided.

SECTION A — (2 × 15 = 30 marks)
1. Classify the cysts of the jaw. Write in detail about Ameloblastoma.
2. Write in detail about the effects of radiation on the living tissues. Add a note on prevention and management of osteoradionecrosis.

SECTION B — (10 × 5 = 50 marks)

3. Write short notes on:
   (a) Secondary Syphilis.
   (b) Oral manifestations of AIDS
   (c) Xeno-radiography.
   (d) Contents of developing solution.
   (e) Hemangioma.
   (f) Sialolithiasis.
   (g) Shingles.
   (h) Properties of X-rays.
   (i) Oral submucous fibrosis.
   (j) Epulis.
APRIL - 2004

[KK 670] Sub. Code : 4162

FINAL B.D.S. DEGREE EXAMINATION.
Part I
(Modified Regulations - II)
Paper II — ORAL MEDICINE (ORAL DIAGNOSIS) AND RADIOLOGY

Time : Three hours Maximum : 100 marks
Sec. A & B : Two hours and Sec. A & B : 80 marks
forty minutes
Section C : Twenty minutes Section C : 20 marks
Answer Sections A and B in the SAME Answer Book.
Answer Section C in the answer sheet provided.

SECTION A — (2 x 15 = 30 marks)

1. Describe the differential diagnosis of oral precancerous lesions and conditions. (15)

2. Describe a technique for taking bitewing radiograph for the posterior teeth. (15)

SECTION B — (10 x 5 = 50 marks)

3. Write briefly on:
   (a) Pagets disease
   (b) Sialadenitis

(c) Intensifying screens
(d) Glossodynia
(e) Management of lichen planus
(f) Myofacial pain dysfunction syndrome
(g) Dens in dente
(h) Tori
(i) Oral manifestations of diabetes mellitus
(j) Cyclic neutropenia.

(Modified Regulations) — I
Paper III — ORAL MEDICINE (ORAL DIAGNOSIS)
AND RADIOLoGY

Time: Three hours
Sec. A & B: Two hours and forty minutes
Sec. A & B: 80 marks
Section C: Twenty minutes
Section C: 20 marks

Maximum: 100 marks
Answer Sections A and B in the SAME Answer Book.
Answer Section C in the answer sheet provided.

SECTION A — (2 x 15 = 30 marks)

1. Classify white lesions of the oral Mucosa and describe the aetiology, clinical features diagnosis and management of oral Lichen Planus. (15)

2. Write in detail about the different causes of faulty radio graph. (15)

SECTION B — (10 x 5 = 50 marks)

3. Write short notes on:
   (a) Intra oral exfoliative cytology.
   (b) Pathergy test.
   (c) Paul Bunnel test.
   (d) Plummer–Vinson syndrome.
   (e) Median Rhomboid Glossitis.
   (f) Erythema Multiforme.
   (g) Mucocele.
   (h) Filters.
   (i) Dosimetry.
   (j) Radiographic appearance of Ameloblastoma.
FINAL B.D.S. DEGREE EXAMINATION.
(Modified Regulations — II)
Part I
Paper II — ORAL MEDICINE (ORAL DIAGNOSIS) AND RADIOLOGY
Time: Three hours  Maximum: 100 marks
Sec. A & B: Two hours and  Sec. A & B: 80 marks
forty minutes
Section C: Twenty minutes  Section C: 20 marks
Answer Sections A and B in the SAME Answer Book.
Answer Section C in the answer sheet provided.
SECTION A — (2 x 15 = 30 marks)
1. Classify the vesiculo-bullous lesions. Write in detail about the aetiology, clinical features, differential diagnosis, investigations, and management of recurrent Herpes infection. (15)
2. Write an essay on the effects of ionizing radiation on the living tissues. Add a note on Radiation safety. (15)

SECTION B — (10 x 5 = 50 marks)
3. Write short notes on:
(a) Lichen Ruber planus
(b) Osteo Radionecrosis
(c) Grid
(d) Xerostomia
(e) Production of X-rays
(f) Lamina Dura
(g) Intensifying screens
(h) Fibroma
(i) Tumour markers
(j) Paralleling angle technique.
FINAL B.D.S. DEGREE EXAMINATION.
(Modified Regulations) — I

Paper III — ORAL MEDICINE (ORAL DIAGNOSIS) AND RADIOLOGY

Time: Three hours
Sec. A & B: Two hours and forty minutes
Sec. C: Twenty minutes

Maximum: 100 marks
Sec. A & B: 80 marks
Sec. C: 20 marks

Answer Sections A and B in the SAME answer book.
Answer Section C in the answer sheet provided.

Answer ALL questions.

SECTION A — (2 × 15 = 30 marks)

1. Classify the cysts of the Jaw. Write in detail about the Aetiopathogenesis, clinical features, differential diagnosis, investigations, management and prognosis of Ameloblastoma.

2. Discuss the methods of Radiation safety and protection of the operator, patient and public.

SECTION B — (10 × 5 = 50 marks)

3. Write short notes on:
   (a) Sialography
   (b) Oral manifestations of AIDS
   (c) SLE (Systemic Lupus Erythematosus)
   (d) Hamartomas
   (e) Xero- Radiography
   (f) Contents of Fixing solution
   (g) Argyria
   (h) Gingival Hyperplasia
   (i) Oral manifestations of Diabetes-mellitus
   (j) Aphthous stomatitis
FINAL B.D.S. DEGREE EXAMINATION.
(Modified Regulations — II, III)
Paper II — ORAL MEDICINE (ORAL DIAGNOSIS) AND RADIOLOGY

Time : Three hours
Sec. A & B : Two hours and forty minutes
Section C : Twenty minutes
Maximum : 100 marks
Sec. A & B : 80 marks
Section C : 20 marks

Answer Sections A and B in the SAME Answer Book.
Answer Section C in the answer sheet provided.

SECTION A — (2 × 15 = 30 marks)

1. Enumerate Premalignant lesion and premalignant conditions. Describe the etiology, clinical features and treatment of oral submucous fibrosis. (15)

2. What is the composition of a radiographic film? Describe the mechanism of image formation. Add a note on the constituents of developing and fixing solution and their functions. (15)

SECTION B — (10 × 5 = 50 marks)

3. Write short notes on:
   (a) Thermo luminescent dosimeter
   (b) Radiographic appearance of fibrous dysplasia
   (c) Automatic film processing
   (d) Gingival hyperplasia
   (e) Oral mucosal pigmentation
   (f) Management of tic douloureux
   (g) Trismus
   (h) Erythema multiforme
   (i) Osteo Radio necrosis
   (j) Oral manifestations of diabetes mellitus.

Paper III — ORAL MEDICINE (ORAL DIAGNOSIS)
AND RADIOLOGY

Time : Three hours
Maximun : 100 marks
Sec. A & B : Two hours and forty minutes
Sec. C : Twenty minutes
Sec. A & B : 80 marks
Sec. C : 20 marks

Answer Sections A and B in the SAME answer Book.

Answer Section C in the answer sheet provided.

Answer ALL questions.

SECTION A — (2 × 15 = 30 marks)

1. Classify salivary gland diseases. Describe the various causes clinical features and the management of sialadenitis. (15)

2. Enumerate the different methods of imaging. Dental and facial structure for diagnostic purpose. Describe the procedure for taking Intraoral perapical radiography of right maxillary first molar by paralleling technique. (15)

SECTION B — (10 × 5 = 50 marks)

3. Write short notes on:

(a) Osteo radionecrosis.
(b) Diagnostic properties of X-rays.
(c) Occlusal Radiograph.
(d) Laboratory investigation in bleeding disorders.
(e) Albright’s syndrome.
(f) Giant cell granuloma.
(g) Oral hairy leukoplakia.
(h) Oral submucous fibrosis.
(i) Clark’s technique.
(j) Management of myofacial pain dysfunction syndrome.

Paper II — ORAL MEDICINE (ORAL DIAGNOSIS) AND RADIOLOGY

Time: Three hours
Descriptive: Two hours and forty minutes
Objective: Twenty minutes

Maximum: 100 marks
Descriptive: 60 marks
Objective: 20 marks

Answer ALL questions.

1. Enumerate various skull Radiographs and discuss in detail Postero Anterior, Paranasal sinus and submasto vertex view of skull. (20)

2. Classify the causes for cervico facial lymphadenopathy and discuss in detail Hodgkin's disease. (15)

3. Enumerate the causes for xerostomia. Describe the clinical features, Investigations and management of Sjogrens syndrome. (15)

4. Write short notes on:
   (a) Bite marks
   (b) Uses and properties of X-ray's
   (c) Internal derangement of temporomandibular joint
   (d) Radiosensitisers and Radioprotectors
   (e) Glosso Pharyngeal Neuralgia
   (f) Discuss briefly the causes for early loss of teeth. (6 x 5 = 30)

Paper III — ORAL MEDICINE (ORAL DIAGNOSIS)
AND RADIOLOGY

Time : Three hours Maximum : 100 marks
Descriptive : Two hours and Descriptive : 80 marks
forty minutes
Objective : Twenty minutes Objective : 20 marks

Answer ALL questions.

I. Essays : (2 × 15 = 30)

1. Enumerate conditions which cause multiple ulcers in the oral cavity. Discuss in detail the aetiology, clinical features, investigations and management of erythema multiforme. (15)

2. Differentiate between the bisecting angle and paralleling technique with diagram. (15)

II. Write short notes on : (10 × 5 = 50)

(a) Compton effect.

(b) Film holders for intraoral periapical radiography.

(c) Causes for faulty radiographs in dental radiography.

(d) Indications and technique for transcranial view of temporomandibular joint.

(e) Oral manifestations of various types of anaemias.

(f) Management of patients with renal diseases in the dental clinic.

(g) Pagets disease.

(h) Trigeminal neuralgia.

(i) Xerostomia and ptyalism.

(j) Vitamin B complex.

FINAL B.D.S. DEGREE EXAMINATION.
(Modified Regulations — II, III)

Paper II — ORAL MEDICINE (ORAL DIAGNOSIS) AND RADIOLOGY

Time: Three hours Maximum: 100 marks
Descriptive: Two hours and forty minutes Descriptive: 80 marks
Objective: Twenty minutes Objective: 20 marks

Answer ALL questions.

Essays: (2 x 15 = 30)

1. Classify immunological disorders. Write in detail the oral manifestations and investigations in Acquired Immune Deficiency Syndrome. (15)

2. Discuss the hazards of ionizing radiation and describe in detail the steps to protect the operator and patients from these hazards. (15)

3. Write short notes on: (10 x 5 = 50)
   (a) Agranulocytosis
   (b) Schermer's test
   (c) Speckled leukoplakia
   (d) Digital imaging
   (e) Water's view
   (f) Dosimetry.
   (g) Fine Needle Aspiration Cytology
   (h) Erythema multiforme
   (i) Dental management of diabetes mellitus
   (j) Glossodynia.

__________________________
II. Short notes: \((10 \times 5 = 50)\)

(1) Oral submucous fibrosis.

(2) Role of Dentists in mass disaster identification.

(3) Collimation and filtration.

(4) Burning mouth syndrome.

(6) Erythema multiformae.

(7) Scintigraphy in dentistry.

(8) Dentigerous cyst.

(9) Bitewing Radiography.

(10) Sialography.

I. Essay: \((2 \times 15 = 30)\)

(1) Enumerate various vesiculo bullous lesions of oral cavity. Describe in detail about pemphigus and pemphigoid.

(2) What is the composition of Radiographic Film? Describe the mechanism of image formation. Add a note on the composition of developing and fixing solution and their functions.

[KT 670] Sub. Code: 4162

FINAL B.D.S DEGREE EXAMINATION
(Modified Regulations – III)
Paper II– ORAL MEDICINE DIAGNOSIS AND
RADIOLOGY

Q.P. Code: 544162

Time: Three hours Maximum: 100 Marks

ANSWER ALL QUESTIONS

I. Essays: (2 X 20 = 40)

1. Classify vesiculo bullous and ulcerative lesions and discuss the etiology, clinical features and management of recurrent aphthous stomatitis.

2. What is ionizing radiation. What are the properties of x-rays and uses of x-rays.

II. Write short notes on: (10 X 6 = 60)

1. Oral thrush.

2. Trigeminal neuralgia.

3. Digital radiography.

4. TNM staging and add a note on cancer chemo therapy.

5. Pemphigus.

7. Waters view.

8. Intensifying screens.

9. Xerostomia and ptyalism.

10. Erythema multiforme.
FINAL B.D.S DEGREE EXAMINATION
(Modified Regulations – III)

Paper II – ORAL MEDICINE DIAGNOSIS AND RADIOLOGY

Q. P. Code : 544162

Time : Three hours
Maximum: 100 Marks

Answer ALL questions.

I. Essays : 

1. Discuss in detail the different conditions producing a chronic sinus in region of angle of mandible.

2. Describe the radiographic appearance of various periapical lesions

II. Write Short notes on :

1. Intensifying screen.
2. Intraoral periapical film.
3. Dosimetry.
4. Sjogrens syndrome.
5. Moniliasis.
6. Papilloma.
7. Herpes zoster.
8. Angular cheilitis.
10. Ankylosis of Tempero mandibular joint.

Paper II– ORAL MEDICINE DIAGNOSIS AND RADIOLOGY

Q.P. Code: 544162

Time: Three hours
Maximum: 100 Marks

Answer ALL Questions

I. Essays: (2 x 20 = 40)

1. Classify Ulcerative lesions of oral cavity and describe the clinical features, investigations and management of acute Herpetic Gingivo-Stomatitis.

2. Discuss the effects of Radiation on orofacial tissues. Write on the Radiation protection measures in dental radiology.

II. Write short notes on: (10 x 6 = 60)

1. Composition and uses of intensifying screens.
2. Occlusal film.
3. Compositions and functions of developing solutions.
5. Multilocular radiolucencies.
6. Indication and radiographic technique for paranasal view.
7. Toluidine blue staining.
8. Angioneurotic Oedema.
10. Sialolith.

*****
FINAL B.D.S. DEGREE EXAMINATION.
(Modified Regulations – III)

Paper II - ORAL MEDICINE DIAGNOSIS AND RADIOLOGY

Q.P. Code : 544162

Time : Three hours

Answer ALL questions.

Maximum : 100 marks

I. Essays:

1. Discuss oral manifestations of systemic disease.
2. Write in detail about ideal radiograph.

(2 x 20 = 40)

II. Write short notes on :

1. Steroid therapy in oral lesions.
3. Immuno florescence tests.
5. Automatic film processors.
6. Toludine blue staining.
7. Staging of oral cancer.
8. Multilocular radiolucencies.
9. Albright-Syndrome
10. Composition and uses of intensifying screen.

(10 x 6 = 60)

****
FOURTH B.D.S. DEGREE EXAMINATION

ORAL MEDICINE DIAGNOSIS AND RADIOLOGY

Q. P. Code: 544162

Time: Three hours

Answer ALL questions

Maximum: 100 Marks

I. Essay Questions:

(2 x 20 = 40)

2. Write in detail with appropriate diagrams, the construction and working of an x-ray tube and production of x-rays.

II. Write Short notes on:

(10 x 6 = 60)

1. Intensifying screens.

2. Object localization.

5. Temporomandibular Radiography.

7. Gate Control Theory of Pain.

8. Hyperparathyroidism.

10. Leukoplakia.

******
FOURTH B.D.S. DEGREE EXAMINATION  
PAPER II ORAL MEDICINE DIAGNOSIS AND RADIOLOGY  
Q.P. Code: 544162  

Time: Three hours  
Maximum: 70 Marks  
Answer ALL questions in the same order  
Draw Suitable diagrams wherever necessary  

I. Elaborate on:  
(2 x 10 = 20)

1. Classify Vesiculobullous lesions of the oral cavity, and write in detail about Pemphigus Vulgaris

2. Classify Fibro osseous lesions of Jaws. Discuss the clinical and Radiographic Features of Fibrous dysplasia

II. Write notes on:  
(10 x 5 = 50)

1. Diagnostic importance of Saliva

2. Significance of Lamina dura

3. Ideal radiograph

4. Differential Diagnosis of Periapical Radiopacities

5. Automatic film processing

6. Short term effects of radiation on tissues

7. Bisecting -Angle Technique

8. Digital Radiography

9. Management of Oral Lichen planus

10. Differential Diagnosis of Depapillation of Tongue

******
I. Elaborate on:

1. Classify the Pigmented lesions of the oral mucosa. Write in detail about the etiology, clinical types, clinical features, investigations and management of Oral lichen planus. 19 30 20

2. What are the principles of Projection Geometry? Write in detail about the principle and method of Paralleling angle technique of intra-oral periapical radiography. 19 30 20

II. Write notes on:

1. Glycosylated Hemoglobin test. 3 10 5
2. Investigations for a case of Oral candidiasis. 3 10 5
3. Medical management of Oral submucous fibrosis. 3 10 5
4. Recurrent Aphthous Ulcers. 3 10 5
5. Drug induced Gingival Overgrowth. 3 10 5
6. Age determination in Forensic Odontology. 3 10 5
7. Factors influencing x-ray beam. 3 10 5
8. Radiovisiography. 3 10 5
9. Thermoluminescent Dosimeters. 3 10 5
10. Advantages of Panoramic radiography. 3 10 5
11. Cotton-wool appearance. 3 10 5
12. Types of radiotherapy. 3 10 5

******
I. Elaborate on: (2X10=20)

1. Classify the White lesions of the oral mucosa. Write in detail about the definition, etiology, clinical types, investigations, and treatment of Oral Leukoplakia.

2. What is the mechanism of image formation in film based radiography. Write in detail about the composition and functions of Developing and fixing solutions.

II. Write notes on: (10x5=50)

1. Exfoliative Cytology
2. Lip prints in Forensic identification
3. Intrinsic discoloration of teeth
4. Hemangioma
5. Ectodermal dysplasia
6. Medical management of TMJ dysfunction syndrome
7. Hepatitis B
8. Dosimeters
9. Object Localization Techniques
10. Water’s projection

******
I. Elaborate on:  

1. Classify ulcerative lesions and discuss the etiology, clinical features, differential diagnosis and management of recurrent aphthous stomatitis.
2. Discuss the principle, technique, advantage and disadvantages of panoramic imaging.

II. Write notes on:  

1. Schillings test
2. Sialadenosis
3. Radiovisiography
4. Factors controlling X ray beam
5. Object localization technique
6. Automatic film processing
7. Oral manifestations of diabetes mellitus
8. Investigation of oral candidiasis
9. Exfoliative cytology
10. Water’s projection.
FOURTH YEAR B.D.S. DEGREE EXAM  
PAPER II - ORAL MEDICINE DIAGNOSIS AND RADIOLOGY  
Q.P Code: 544162

Time: Three hours  
Maximum: 70 marks

I. Elaborate on:  
(2X10=20)

1. Classify immunological disorders. Write in detail the oral manifestations and investigations in Acquired Immune Deficiency Syndrome.

2. Describe in detail about principle, technique, advantages and disadvantages of bisecting angle technique

II. Write Notes on:  
(10X5=50)

1. Intensifying screen
2. Drug induced gingival enlargement
3. Multilocular radiolucency
4. Hyperparathyroidism
5. Indications and technique of Transcranial view of TMJ.
6. Osteoradionecrosis
7. Capillary fragility test
8. Sialolithiasis
9. Burning mouth syndrome
10. Occlusal radiographs

******
FOURTH YEAR B.D.S. DEGREE EXAM  
PAPER II - ORAL MEDICINE DIAGNOSIS AND RADIOLOGY  

Q.P Code: 544162

Time: Three hours  
Maximum: 70 marks

Answer All Questions in the same order  
Draw suitable diagrams wherever necessary

I. Elaborate on:  
(2X10=20)

1. Enumerate causes for cervico facial lymphadenopathy. Discuss in detail the etiopathogenesis, clinical manifestations and treatment of Hodgkin’s disease.

2. What is ionizing radiation? Discuss in detail the hazards of ionizing radiation to human body and the measures to be adopted for protection against these hazards in dental radiology.

II. Write Notes on:  
(10X5=50)

1. Glucose tolerance test
2. Plummer-Vinson syndrome
3. Glossodynia
4. Radiographic features of chronic periodontis
5. Oral thrush
6. Bite marks
7. Properties of x-rays
8. Periapical films
9. Lamina dura
10. Characteristic radiation

******
I. Elaborate on: (2 x 10 = 20)

1. Define trismus. Classify the various causes of trismus, Discuss in detail about the aetiology, clinical features and management of Oral Submucous Fibrosis.

2. Define an ideal radiograph. Discuss in detail about the factors responsible for faulty radiographs.

II. Write Notes on: (10 x 5 = 50)

1. Trigeminal neuralgia.
2. Dental considerations in patients with ischemic heart diseases.
3. Multilocular radiolucencies.
4. Drug induced gingival hyperplasia.
5. Sialography.
6. Thrombocytopenic purpura.
7. Intensifying screens.
8. Digital radiography.
9. Corticosteroids and their uses in dentistry.
10. Lip prints.

******
I. Elaborate on:  
(2 x 10 = 20)  
1. What is oral cancer? Discuss in detail about etiology, clinical features, investigation, treatment modalities of oral cancer.  
2. What are the indications of periapical radiograph? Write in detail about bisecting angle technique.  

II. Write notes on:  
(10 x 5 = 50)  
1. Management of candidiasis.  
2. Sialadenosis.  
3. Mixed radiolucent and radiopacities of jaws.  
4. Newer antibiotics in dentistry.  
5. Kveim test.  
6. TMJ arthritis.  
7. Collimation.  
8. Faulty radiographs.  
9. Role of Forensic Odontology in mass disaster.  
10. Water’s view.
FOURTH YEAR B.D.S. DEGREE EXAMINATION
PAPER II – ORAL MEDICINE DIAGNOSIS AND RADIOLOGY

Q.P. Code : 544162

Time : Three Hours                Maximum : 70 Marks
Answer All Questions in the same order
Draw suitable diagrams wherever necessary

I. Elaborate on:                           (2 x 10 = 20)

1. Enumerate oral viral lesions. Discuss in detail the etiopathogenesis, clinical features, 
diagnosis, differential diagnosis & management of secondary varicella zoster infection.

2. What is an ideal radiograph? Discuss in detail the factors controlling the diagnostic 
quality of dental radiographs.

II. Write Notes on:                       (10 x 5 = 50)

1. Agranulocytosis.

2. Ankylosis of temporomandibular joint.

3. Prothrombin time.

5. Latent image.

6. Occlusal radiograph.

8. Thermo luminescent dosimeter.
