

August 2011

[KZ 4265]

Sub. Code: 4265

THIRD B.PHARM. EXAMINATION

Paper V – HOSPITAL AND CLINICAL PHARMACY

Q.P. Code : 564265

Time : Three hours

Maximum: 100 Marks

Answer ALL questions.

I. Essay questions:

(2 x 20 = 40)

1. Discuss in detail the preparation of radioisotopes and specifications for radioactive laboratory?
2. Explain in detail the preparation of Hospital formulary?

II. Write short notes on:

(8 x 5 = 40)

1. Discuss the functions of Pharmacy and Therapeutic committee.
2. Write the procedure involved in dispensing of controlled drugs.
3. Mention the packing materials used prior to sterilization.
4. Explain drug – drug interaction with examples.
5. Write the methods for collecting drug information.
6. Write about the dosage individualization in patients.
7. Write a note on Prescription filling?
8. Discuss the steps in counseling.

III. Short Answer Questions:

(10 x 2 = 20)

1. Types of purchase.
2. Important contents of Hospital formulary.
3. Examples for sterilization equipments.
4. Define radioactive half life.
5. Record linkage studies.
6. Define ward Pharmacy
7. Importance of Master formula card
8. Two disease treatment schedule
9. Types of charging policy
10. Continuing education programme for pharmacist

February 2012

[LA 4265]

Sub. Code: 4265

THIRD B.PHARM. EXAMINATION
Paper V – HOSPITAL AND CLINICAL PHARMACY

Q.P. Code: 564265

Time: Three hours

Maximum: 100 Marks

Answer ALL questions.

I. Elaborate on:

(2X20=40)

1. List out and explain in detail about the various methods of drug distribution in a hospital.
2. Define Pharmacy and Therapeutic Committee and discuss its objective and functions in detail.

II. Write notes on:

(8X5=40)

1. Prescription filling and refilling.
2. Dispensing to Out Patients.
3. Dry heat sterilization and its equipment.
4. Budget preparation.
5. Medication Error.
6. Sources of Drug Information.
7. Classification of ADR's.
8. Inventory control and its significances.

III. Short Answer:

(10X2=20)

1. Object drug in drug interactions.
2. Controlled substances.
3. Units of Radioactivity.
4. Idiosyncrasy
5. Types of medication Error.
6. Patient compliance.
7. Different Phases of Clinical Trials.
8. ABC Analysis.
9. Case Control Studies.
10. Types of Hospitals.

[LB 4265]

AUGUST 2012

Sub. Code: 4265

THIRD YEAR B.PHARM. EXAM

Paper V – HOSPITAL AND CLINICAL PHARMACY

Q.P. Code: 564265

Time : Three hours

Maximum: 100 Marks

(180 Min) Answer ALL questions in the same order.

I. Elaborate on:

**Pages Time Marks
(Max.) (Max.) (Max.)**

- | | | | |
|--|----|----|----|
| 1. (a).Define hospital formulary system, what are the guidelines for hospital formulary system? What are the contents of hospital formulary?
(b).Discuss the steps involved in patient counseling and the barriers involved in patients counseling. | 19 | 33 | 20 |
| 2. What is patient compliance? Give its types, factors associated with and consequences of non- compliance. Describe the methods of achieving patient compliance? | 19 | 33 | 20 |

II. Write notes on:

- | | | | |
|--|---|---|---|
| 1. Explain the various methods of production of radio pharmaceuticals. | 3 | 8 | 5 |
| 2. Distribution system of drugs for the in-patients. | 3 | 8 | 5 |
| 3. Explain automatic stop order for dangerous drugs. | 3 | 8 | 5 |
| 4. Write a note on various counseling procedures adopted for diabetes and hypertension patients. | 3 | 8 | 5 |
| 5. Write a note on purchasing procedure in hospitals. | 3 | 8 | 5 |
| 6. Reporting of adverse drug reaction. | 3 | 8 | 5 |
| 7. Write a note on drug interaction. | 3 | 8 | 5 |
| 8. Discuss the role of hospital pharmacist in continuing education program. | 3 | 8 | 5 |

III. Short Answer:

- | | | | |
|---|---|---|---|
| 1. Idiosyncrasy. | 1 | 5 | 2 |
| 2. EOQ. | 1 | 5 | 2 |
| 3. Methods of detecting adverse drug effects. | 1 | 5 | 2 |
| 4. Pharmacokinetic parameters. | 1 | 5 | 2 |
| 5. ICH-guidelines. | 1 | 5 | 2 |
| 6. Rational use of drugs. | 1 | 5 | 2 |
| 7. Out-patient dispensing methods. | 1 | 5 | 2 |
| 8. Non charge floor stock drugs. | 1 | 5 | 2 |
| 9. Techniques of inventory control. | 1 | 5 | 2 |
| 10. Prevention of radiation hazards in hospitals. | 1 | 5 | 2 |

Sub. Code: 4265

THIRD YEAR B.PHARM. EXAM
Paper V – HOSPITAL & CLINICAL PHARMACY

Q.P. Code : 564265

Time: Three Hours
(180 Min)

Maximum: 100 marks

I. Long Essays: (2 x 20 = 40)

1. Explain in detail the preparation of Hospital formulary?
2. Discuss in detail the drug dispensing methods for outpatients and inpatients?

II Short Notes: (8 x 5 = 40)

1. Functions of Pharmacy and Therapeutic committee.
2. Types of material used for Sterilization in hospital?
3. Methods used in drug information retrieval?
4. Note on preparation of radioisotopes in lab.
5. Explain adverse drug reaction following drug withdrawal.
6. Discuss the concept behind medication history interview
7. Explain the concept of professional training for pharmacist in hospital
8. Discuss Case Control studies with example?

III. Short Answers: (10 x 2 = 20)

1. Examples for medication error.
2. Genetically determined toxicity.
3. Units for radioactivity.
4. Define adverse drug reaction.
5. Mention computerized based drug information services.
6. Different types of labeling in Pharmacy store
7. Two barriers in counseling
8. Define continuing pharmacy education programme
9. Define spontaneous case reporting?
10. Mention any two records to be preserved during the manufacture sterile products?

(LD 4265)

AUGUST 2013

Sub. Code: 4265

**THIRD YEAR B.PHARM. EXAM
PAPER V – HOSPITAL AND CLINICAL PHARMACY**

Q.P. Code: 564265

Time: Three Hours

Maximum: 100 marks

I. Elaborate on:

(2X20=40)

1. Explain in detail about the objectives and functions of pharmacy and therapeutic committee.
2. Discuss briefly about the preparation of radio isotopes

II. Write notes on:

(8X5=40)

1. Responsibilities of hospital pharmacist
2. Contents of hospital formulary
3. Types of outpatients
4. Dry heat sterilization and its equipment
5. Cohort studies
6. Pharmacodynamic drug interaction
7. Patient compliance
8. Clinical trials

III. Short Answers on:

(10X2=20)

1. Units of radioactivity
2. Drug profile
3. Allergic drug reaction
4. Types of purchase
5. Mention any two disease treatment schedule
6. Examples for sterilization equipments
7. Significance of PTC
8. Types of medication errors
9. Spontaneous case reports
10. Dosage individualization

(LE 4265)

FEBRUARY 2014

Sub. Code: 4265

**THIRD YEAR B.PHARM. EXAM
PAPER V – HOSPITAL AND CLINICAL PHARMACY**

Q.P. Code: 564265

Time: Three Hours

Maximum: 100 marks

I. Elaborate on: (2X20=40)

1. Define and explain various phases of clinical trials with their significance.
2. Classify and explain Adverse Drug Reaction. Add a note on excessive pharmacological effects.

II. Write notes on: (8X5=40)

1. Hospital formulary system
2. Drug information resources
3. Composition and functions of pharmacy and therapeutic committee
4. Classification of hospital with examples.
5. Interaction between anti-diabetics with dexamethasone
6. Barriers of patient counseling
7. Medication errors and their prevention
8. Concept and uses of medication history interview

III. Short Answers on: (10X2=20)

1. Ambulatory patients
2. Unit dose dispensing system
3. Radioactive half life
4. Master formula card
5. Economic order quantity
6. Various methods of sterilization
7. Dots therapy
8. Contents of hospital formulary
9. Importance of Inventory control
10. Dispensing of narcotics

(LF 4265)

AUGUST 2014

Sub. Code: 4265

**THIRD YEAR B.PHARM. EXAM
PAPER V – HOSPITAL AND CLINICAL PHARMACY**

Q.P. Code: 564265

Time: Three hours

Maximum: 100 marks

I. Essay:

(2X20=40)

1. What is hospital pharmacy? Discuss typical organizational structure of hospital pharmacy department and its responsibility in health care system.
2. Define pharmacy and therapeutic committee. Discuss the objectives and functions of pharmacy and therapeutic committee.

II. Short notes:

(8X5=40)

1. Define compliance. Discuss about various methods to improve non-compliance.
2. Dry heat sterilization.
3. Dispensing of drugs to inpatients.
4. Therapeutic Drug Monitoring of phenytoin.
5. Preparation of hospital formulary.
6. Classification of ADR
7. Drug-Drug interaction
8. Patient medication counseling.

III. Short Answers:

(10X2=20)

1. Biological half life
2. What is satellite pharmacy?
3. Define the term sterilization
4. Idiosyncrasy
5. Define drug inventory control
6. Reason for conducting clinical trial
7. Radioisotope generations
8. Medline
9. Ambulatory patient
10. Define agonist - antagonist

(LG 4265)

FEBRUARY 2015

Sub. Code: 4265

**THIRD YEAR B.PHARM. EXAMINATION
PAPER V – HOSPITAL AND CLINICAL PHARMACY**

Q.P. Code: 564265

Time: Three hours

Maximum: 100 marks

I. Essay:

(2 x 20 = 40)

1. Define and explain nuclear pharmacy, preparation of radio isotopes and proper disposal of radioactive hazards.
2. a) Explain in brief about purchase and inventory control methods.
b) Role of pharmacist in the management of central sterile supply unit.

II. Short notes:

(8 x 5 = 40)

1. Cohort studies and case control studies.
2. Retrieval of information and Medline
3. Dispensing of controlled drugs
4. Hospital formulary preparation, revision and contents
5. Role of pharmacist in budget preparation and implementation
6. Classification of adverse drug reaction
7. Interaction between tetracycline and food products
8. Good clinical practices and reasons for conducting clinical trials

III. Short answers:

(10 x 2 = 20)

1. Functions of pharmacy and therapeutic committee
2. VED analysis
3. Therapeutic drug monitoring
4. Steps involved in patient counseling
5. Idiosyncrasy
6. EOQ
7. Medication error classification
8. Radioactive half life
9. Primary source of information on drugs
10. Multi specialty hospital

B.PHARM. DEGREE EXAMINATION

THIRD YEAR

PAPER V – HOSPITAL & CLINICAL PHARMACY

Q.P. Code: 564265

Time : Three Hours

Maximum : 100 marks

Answer All Questions

I. Essay:

(2 x 20 = 40)

1. Dispensing of drugs to in-patients, types of drug distribution system, charging policy and labeling.
2. What is drug information center? Discuss in detail about various resources for drug information center. Add note on answering drug information queries.

II. Short notes :

(8 x 5 = 40)

1. Methods of detecting adverse drug effects.
2. Patient Medication counseling.
3. Different phases of clinical trails.
4. Pharmacy & Therapeutic committee.
5. Inventory control of drugs.
6. Pharmacodynamic drug interactions.
7. Purchasing procedure of drugs in hospital.
8. Radiation hazards.

III. Short answers:

(10 x 2 = 20)

1. TDM indications.
2. Nuclear pharmacy.
3. Adverse Drug Reaction Monitoring.
4. Clinical trial.
5. Human ethical committee.
6. Lead time.
7. ABC analysis.
8. MEDLINE.
9. Hospital formulary.
10. Mobile dispensing unit.

**THIRD YEAR B.PHARM. EXAMINATION
PAPER V – HOSPITAL & CLINICAL PHARMACY**

Q.P. Code: 564265

Time: Three hours

Maximum: 100 Marks

I. Essay :

(2 x 20 = 40)

1. What are the various methods of Drug Distribution? Discuss the dispensing of drugs to outpatients & inpatients.
2. What is Patient Medication Counseling? Give the various steps involved and barriers in patient Counseling.

II. Short notes on :

(8 x 5 = 40)

1. Write a note on dry heat Sterilization.
2. Discuss the preparation of Hospital formulary.
3. Give an account of radiation hazards.
4. What are the various sources of information on Drugs?
5. What are the different methods of detecting Adverse Drug Reactions?
6. Give the indications for Therapeutic drug monitoring.
7. Write the method of preparation of a hospital budget.
8. Discuss-Ethics in clinical research.

III. Short answers on :

(10 x 2 = 20)

1. Give two methods to improve patient compliance.
2. Yellow card system.
3. What is Pasteurization?
4. Give the units of Radioactivity.
5. What is Hypersensitivity reaction? Give an example.
6. Give the significance of Cohort studies.
7. What is Envelope system?
8. Mention two reasons for conducting clinical trials.
9. Give the types of drug interactions.
10. Write the composition of PTC.

Sub. Code: 4265

**B.PHARM. EXAMINATION
THIRD YEAR
PAPER V – HOSPITAL & CLINICAL PHARMACY**

Q.P. Code: 564265

Time: Three hours

Maximum: 100 Marks

I. Elaborate on:

(2 x 20 = 40)

1. a) Define a hospital. Discuss the organization of a hospital.
b) Discuss the contents and preparation of a hospital formulary.
2. a) What are the different types of drug interactions? Discuss drug interactions involving absorption.
b) What is patient compliance? Give the methods to improve compliance.

II. Write notes on:

(8 x 5 = 40)

1. Write a note on purchasing procedures followed in a hospital.
2. GCP – ICH Guidelines.
3. Discuss the role played by a pharmacist in TDM.
4. Outline the production of radioisotopes using radio isotope generators.
5. Give an account of unit dose drug dispensing for inpatients.
6. What are the different ways of packing of materials before sterilization?
7. Give the different sources of drug information.
8. Give the responsibilities of a hospital pharmacist.

III. Short answers on:

(10 x 2 = 20)

1. What is non charge floor stock drugs?
2. What do you mean by record linkage studies?
3. Give two examples for medication error.
4. Define clinical trials.
5. What is a drug information centre?
6. Define radioactive half life.
7. Give two methods used to measure the radiation dose received.
8. Mention the advantages of individual prescription order.
9. What are the physical methods of sterilization?
10. Give reasons for TDM of phenytoin.

**B.PHARM. EXAMINATION
THIRD YEAR
PAPER V – HOSPITAL & CLINICAL PHARMACY**

Q.P. Code: 564265

Time: Three hours

Maximum: 100 Marks

I. Elaborate on: **(2 x 20 = 40)**

1. a) Discuss in detail about the purchase procedure for a hospital pharmacy.
b) Explain inventory, inventory control and explain in detail about the ABC analysis.
2. a) What are clinical trials and explain in detail about the various phases of it, along with the applications?
b) What are adverse drug reactions and write in detail about its causality assessment.

II. Write notes on: **(8 x 5 = 40)**

1. Write a brief note on unit dose dispensing technique.
2. Explain how dispensing of controlled substances are to be carried out in a hospital pharmacy?
3. Discuss briefly the production of radioactive pharmaceuticals.
4. Explain briefly on various radiation hazards and methods to prevent it.
5. Write a brief note on cohort and case control studies.
6. Explain briefly the barriers for patient counseling.
7. Write briefly about the ethics in clinical research.
8. What are the principles of Good Clinical Practice (GCP)?

III. Short answers on: **(10 x 2 = 20)**

1. Patient Medication Counseling.
2. Patient Compliance.
3. Classification of drug interactions.
4. Examples for Drug - Food Interactions.
5. Composition of a Pharmacy and Therapeutic Committee.
6. What are spontaneous case reports?
7. Different types of sterilization.
8. List out various types of drug distribution to hospital inpatients.
9. Define a hospital formulary and its contents.
10. Permissible radiation dose level.

Q.P. Code: 564265

Time: Three hours

Maximum: 100 Marks

I. Elaborate on:

(2 x 20 = 40)

1. Define and explain nuclear pharmacy. Outline the production of radioisotopes using radio isotope generators.
2. Discuss about Drug information center, various resources for drug information center and steps involved in answering drug information query.

II. Write notes on:

(8 x 5 = 40)

1. Define drug interaction and its types.
2. Role of pharmacist in the management of central sterile supply unit.
3. Define compliance and various methods to improve compliance.
4. Write a note on in-patient drug distribution system.
5. Preparation of hospital formulary.
6. Discuss the inventory control techniques.
7. Discuss about pharmacy and therapeutic committee.
8. Patient counseling and steps involved in patient counselling.

III. Short answers on:

(10 x 2 = 20)

1. Define adverse drug reaction.
2. Cohort and case control study.
3. Units of Radioactivity.
4. Dry heat sterilization.
5. Drug-food interaction.
6. Define medication error.
7. Define EOQ.
8. Types of budget.
9. Phase -IV of clinical trials.
10. ICH guidelines.
