

MARCH 2007

[KQ 1527]

Sub. Code : 3071

DIPLOMA IN DERMATOLOGY, VENEREOLOGY  
LEPROSY EXAMINATION.

Paper II — PRINCIPLE OF DERMATOLOGY  
DIAGNOSIS AND THERAPEUTICS

Common to

(Candidates admitted from 1993-94 onwards

And

Candidates admitted from 2004-2005 onwards)

Time : Three hours

Maximum : 100 marks

Theory : Two hours and  
forty minutes

Theory : 80 marks

M.C.Q. : Twenty minutes

M.C.Q. : 20 marks

Answer ALL questions.

Draw suitable diagrams wherever necessary.

I. Essay questions :

1. Classify mastocytosis. Describe clinical features and management of various types of mastocytoses. (20)

2. Classify antifungal drugs. Give mechanism of action, indications, dosages and side effects of systemic antifungal agents. (15)

3. How will you approach a case of cutaneous vasculitis? (15)

II. Write short notes : (6 × 5 = 30)

- (a) Zygomycosis.
- (b) Id eruptions
- (c) Sweet's syndrome.
- (d) Pseudolymphomas.
- (e) Nails in systemic diseases.
- (f) Anti ageing therapies.

DIPLOMA IN DERMATOLOGY, VENEREOLOGY, AND LEPROSY  
EXAMINATION.

Paper II — PRINCIPLE OF DERMATOLOGY, DIAGNOSIS AND  
THERAPEUTICS

(Common to all Regulations)

**Q.P. Code : 343075**

Time : Three hours

Maximum : 100 marks

Answer ALL questions.

Draw suitable diagrams wherever necessary.

- I. Essay questions: (2 × 20 = 40)
1. Classify eczemas. Describe in detail etiology, clinical features and management of atopic dermatitis. (20)
  2. Give an account on tuberculosis of skin. (20)
- II. Write Short notes : (10 × 6 = 60)
1. Yellow Nail syndrome.
  2. Lupus pernio.
  3. Pulse therapy.
  4. Acne conglobata.
  5. Immunology of scabies.
  6. Post herpetic neuralgia.
  7. Drug induced pemphigoid.
  8. Criteria to diagnosis of systemic lupus erythematosus.
  9. Rhinophyma.
  10. Management of Toxic epidermal necrolysis.

**I. Elaborate on:** **(2 x 15 = 30)**

1. Classify Eczema. Discuss about the Etiology, morphological patterns, differential diagnosis and management of Hand eczema.
2. What are the various connective tissue diseases? Discuss in detail about etiology, clinical features, diagnosis and treatment of systemic lupus erythematosus.

**II. Write notes on:** **(10 x 7 = 70)**

1. Newer antifungal drugs.
2. Perioral dermatitis.
3. Angry back syndrome.
4. QuantiFERON gold blood test.
5. Chemical peeling.
6. Mucosal lichen planus.
7. Porphyria cutanea tarda.
8. Tinea imbricata.
9. Migratory erythemas.
10. Scrofuloderma.

**Maximum: 100 Marks**

**I. Elaborate on:** **(2 x 15 = 30)**

1. Discuss about the various clinical presentation of sarcoidosis, diagnosis treatment and differential diagnosis of sarcoidosis.
2. Write in detail about clinical features, differential diagnosis and management of dermatoses of pregnancy.

**II. Write notes on:** **(10 x 7 = 70)**

1. Diagnosis of Mycetoma.
2. Photodynamic therapy.
3. Angioedema.
4. Rosacea.
5. Diagnosis and treatment of Bullous lichenplanus.
6. Mention the clinical types and diagnosis of epidermolysis bullosa simplex.
7. Patch testing.
8. Infantile gluteal granuloma.
9. Dermatoscopy.
10. Follicular occlusion triad.

**Maximum: 100 Marks**

**I. Elaborate on:**

**(2 x 15 = 30)**

1. Discuss in detail the pathogenesis, clinical features and management of pyoderma gangrenosum.
2. Enlist the various skin infections caused by staphylococcus aureus.  
Discuss in detail the pathogenesis, clinical features and management of staphylococcal scalded skin syndrome.

**II. Write notes on:**

**(10 x 7 = 70)**

1. Livedo reticularis.
2. Targeted Phototherapy.
3. IgA pemphigus.
4. Dermal fillers.
5. Rituximab in dermatology.
6. Fetal varicella syndrome.
7. Hartnups disease.
8. Dematiaceous fungi.
9. Erythema annulare centrifugum.
10. Lupus panniculitis.

**Maximum: 100 Marks**

**I. Elaborate on:** **(2 x 15 = 30)**

1. Enumerate the causes of subepidermal bulla. Discuss the pathogenesis, clinical features and management of Linear IgA bullous dermatosis of childhood.
2. Discuss the pathophysiology, clinical features, differential diagnosis and Management of Atopic dermatitis.

**II. Write notes on:** **(10 x 7 = 70)**

1. Pityriasis alba.
2. Hair dye dermatitis.
3. Scrofuloderma.
4. Azathioprine.
5. FDE.
6. Medical Management of vitiligo.
7. Topical antifungals.
8. Staphylococcal scalded skin syndrome.
9. Direct immunofluoresence in Dermatology – Principles and applications.
10. Topical corticosteroids – Class I and II.

**Time: Three Hours**

**Maximum: 100 Marks**

**I. Elaborate on:** (2 x 15 = 30)

1. Discuss the etiopathogenesis, clinical features and management of non hereditary localised cutaneous amyloidosis.
2. Discuss the etiopathogenesis, clinical features and management of dermatomyositis.

**II. Write notes on:** (10 x 7 = 70)

1. Parthenium dermatitis.
2. Pseudolymphomas
3. Pemphigoid gestationis
4. Role of platelet rich plasma and platelet rich fibrin in dermatology.
5. Angiokeratomas.
6. Kawasaki disease.
7. Congenital poikiloderma.
8. Multiple lentigenes.
9. Rituximab in autoimmune bullous disorders.
10. Cutaneous manifestation of chronic renal failure.
