

THE TAMIL NADU DR. M.G.R. MEDICAL UNIVERSITY

(LP 2042)

SEPTEMBER 2019

Sub. Code: 2042

**B.PHARM. DEGREE EXAMINATION
PCI Regulation – SEMESTER IV
PAPER III – PHYSICAL PHARMACEUTICS – II**

Q.P. Code: 562042

Time: Three hours

Maximum: 75 Marks

I. Elaborate on: Answer any TWO questions. (2 x 10 = 20)

1. Define and classify Colloids with suitable examples. Discuss their electrical properties.
2. Explain objectives, procedures and limitations of accelerated stability testing.
3. Describe the various types of rheological systems with suitable rheogram and examples.

II. Write notes on: Answer any SEVEN questions. (7 x 5 = 35)

1. Differentiate flocculated suspension from deflocculated suspension.
2. Discuss Sedimentation technique that used for particle size analysis.
3. Describe the derived properties of powders.
4. Derive first order rate constant.
5. Describe Cup and Bop viscometer.
6. Classify emulsifying agents with examples.
7. Explain the stability of colloids by DLVO theory.
8. Write a note on electrical double layer in colloids.
9. Write a note on factors influencing the chemical degradation of pharmaceutical product.

III. Short answers on: Answer ALL questions. (10 x 2 = 20)

1. Thixotropy.
2. Glidants with examples.
3. Half-life.
4. Bulges and spurs.
5. Protective colloids.
6. Heckel equation.
7. BET equation.
8. Coacervation.
9. HLB scale.
10. Particle size distribution.

THE TAMIL NADU Dr.M.G.R. MEDICAL UNIVERSITY

(LQ 2042)

MARCH 2020

Sub. Code: 2042

**B.PHARM. DEGREE EXAMINATION
PCI Regulation – SEMESTER IV
PAPER III – PHYSICAL PHARMACEUTICS – II**

Q.P. Code: 562042

Time: Three hours

Maximum: 75 Marks

I. Elaborate on: Answer any TWO questions. (2 x 10 = 20)

1. Describe the factors influencing the chemical degradation of pharmaceutical products.
2. Explain the methods to determine particle size.
3. What are suspensions? Describe formulation of suspensions. Add notes on theory of sedimentation.

II. Write notes on: Answer any SEVEN questions. (7 x 5 = 35)

1. Instabilities of emulsion.
2. Pharmaceutical application of colloids.
3. Non-Newtonian system.
4. Decomposition and stabilization of drugs.
5. Dilatant flow.
6. Cone and Plate viscometer.
7. Rate and order of reaction.
8. Air permeability technique for measurement of specific surface.
9. Determination of half-life and Shelf life of a drug.

III. Short answers on: Answer ALL questions. (10 x 2 = 20)

1. Coalescence and breaking.
2. Plastic flow.
3. Critical micelle concentration.
4. Kinematic viscosity.
5. Zeta potential.
6. Specific rate constant.
7. Hydrolysis.
8. Peptization.
9. Accelerated stability testing.
10. Micromeritics.

THE TAMIL NADU DR. M.G.R. MEDICAL UNIVERSITY

[BPHARM 0321]

MARCH 2021

Sub. Code: 2042

(SEPTEMBER 2020 EXAM SESSION)

B. PHARMACY DEGREE EXAMINATION

PCI Regulation SEMESTER – IV

PAPER III – PHYSICAL PHARMACEUTICS II

Q.P. Code : 562042

Time: Three hours

Maximum: 75 Marks

I. Elaborate on: Answer any TWO questions.

(2 x 10 = 20)

1. Explain about formulation of suspensions.
2. Summarize the derived properties of powders.
3. Explain briefly on degradation and stabilization study of medicinal agents.

II. Write notes on: Answer any SEVEN questions.

(7 x 5 = 35)

1. Explain the electrical method to determine particle volume.
2. Discuss about instabilities of emulsion.
3. What is thixotrophy? Explain thixotropic behavior in formulations.
4. Discuss the methodology and limitations of accelerated stability testing.
5. Define colloid. Classify colloids with suitable examples.
6. Describe about multipoint viscometers.
7. Explain about micro emulsion.
8. Define specific surface. Describe about fisher's subsieve sizer.
9. Explain about donnan membrane effect.

III. Short answers on: Answer ALL questions.

(10 x 2 = 20)

1. Write about rheopexy.
2. What is Bancroft's Rule?
3. Define shelf life.
4. What is protective colloid? Give any two examples.
5. Write any two applications of micromeritics in pharmacy.
6. Define pseudo zero order reaction with example.
7. Projected diameter and stoke's diameter.
8. Define multiple emulsion.
9. Define yield value in plastic system.
10. State any two applications of colloids.

THE TAMIL NADU DR. M.G.R. MEDICAL UNIVERSITY

[BPHARM 0122]

**JANUARY 2022
(MARCH 2021 EXAM SESSION)**

Sub. Code: 2042

B.PHARMACY DEGREE COURSE (SEMESTER EXAMINATIONS)

PCI Regulation 2017 – SEMESTER IV

PAPER III – PHYSICAL PHARMACEUTICS II

Q.P. Code : 562042

Time: Three hours

Maximum: 75 Marks

I. Elaborate on: Answer any TWO questions. (2 x 10 = 20)

1. Explain the various theories of emulsification.
2. What is meant by Rheology? Explain shear thickening and shear thinning with suitable examples.
3. Describe the electrical properties of colloids.

II. Write notes on: Answer any SEVEN questions. (7 x 5 = 35)

1. Discuss preservation of emulsions.
2. Compare and contrast lyophilic and lyophobic colloids.
3. Explain the various methods for determination of order of a reaction.
4. Describe the microscopic method for the determination of particle size and size distribution.
5. Give an account of applications of rheology in pharmacy.
6. Describe controlled flocculation.
7. Explain the factors influencing rate of reaction.
8. Describe the principle and working procedure involved in cup and bob viscometer.
9. Explain the term micromeritics and its significance in pharmacy.

III. Short answers on: Answer ALL questions. (10 x 2 = 20)

1. Define order of reaction.
2. Explain the term thixotrophy.
3. Define angle of repose.
4. Stoke's law.
5. What is kraft and cloud point?
6. Overages.
7. Define Brownian motion.
8. Bulkiness.
9. Define emulsifying agent and give examples.
10. Newton's law of flow.

THE TAMIL NADU DR. M.G.R. MEDICAL UNIVERSITY

[BPHARM 0522]

MAY 2022

Sub. Code: 2042

(SEPTEMBER 2021 EXAM SESSION)

B. PHARMACY DEGREE EXAMINATION

PCI Regulation SEMESTER - IV

PAPER III – PHYSICAL PHARMACEUTICS II

Q.P. Code : 562042

Time: Three hours

Maximum: 75 Marks

I. Elaborate on: Answer any TWO questions.

(2 x 10 = 20)

1. Define colloids. Discuss their electrical properties of colloidal system.
2. Explain the objectives, procedure and limitations of accelerated stability studies.
3. Differentiate Newtonian and non-Newtonian fluids with examples.

II. Write notes on: Answer any SEVEN questions.

(7 x 5 = 35)

1. Stability of suspension with sedimentation parameters.
2. Write about instability of emulsion.
3. Discuss the application of Micromeritics.
4. Explain the concept of Thixotropy.
5. Cone and Plate viscometer.
6. Decomposition and stabilization of drugs.
7. Nernst and Zeta potential.
8. Protective colloids.
9. Write about air permeability technique for measurement of surface area.

III. Short answers on: Answer ALL questions.

(10 x 2 = 20)

1. Multiple Emulsion.
2. Micellar Solubilization.
3. Bancroft rule.
4. Tyndall effect.
5. Viscosity.
6. Rheopexy.
7. Edmundson equation.
8. Angle Repose.
9. Half life.
10. Define rate of reactions.

THE TAMIL NADU DR. M.G.R. MEDICAL UNIVERSITY

[BPHARM 1022]

**OCTOBER 2022
(MARCH 2022 EXAM SESSION)**

Sub. Code: 2042

**B.PHARMACY DEGREE COURSE (SEMESTER EXAMINATIONS)
PCI Regulation 2017 – SEMESTER IV
PAPER III – PHYSICAL PHARMACEUTICS II**

Q.P. Code : 562042

Time: Three hours

Maximum: 75 Marks

I. Elaborate on: Answer any TWO questions. (2 x 10 = 20)

1. Name various factors that affect rate of reaction. Describe how temperature and dielectric constant affects the rate of reaction.
2. Write in detail about thixotropy, anti-thixotropy and measurement of thixotropic coefficient.
3. How drugs undergo decomposition by oxidation? Describe various approaches to prevent oxidative degeneration.

II. Write notes on: Answer any SEVEN questions. (7 x 5 = 35)

1. Describe the interfacial properties of suspended particles.
2. Write a note on deformation of solids.
3. Explain the various methods to prepare lyophobic colloids.
4. Discuss the sieving technique used for particle size analysis.
5. Write a note on preservation of emulsion.
6. Explain various methods to determine order of reaction.
7. Discuss protective action of colloids.
8. Write in brief about flow properties of powders.
9. Describe different graphical presentations of particle size distribution in powder analysis.

III. Short answers on: Answer ALL questions. (10 x 2 = 20)

1. Bingham Bodies.
2. Faraday-Tyndall effect.
3. Elastic Modulus.
4. Feret diameter.
5. Sedimentation Volume.
6. Particle Number.
7. Association Colloids.
8. Donnan Membrane effect.
9. Heavy powders and Light powders.
10. Define Shelf life.

THE TAMIL NADU DR. M.G.R. MEDICAL UNIVERSITY

[B.PHARM 0323]

**MARCH 2023
(SEPTEMBER 2022 EXAM SESSION)**

Sub. Code: 2042

**B.PHARMACY DEGREE COURSE (SEMESTER EXAMINATIONS)
PCI Regulation 2017 – SEMESTER IV
PAPER III – PHYSICAL PHARMACEUTICS II**

Q.P. Code: 562042

Time: Three hours

Maximum: 75 Marks

I. Elaborate on: Answer any TWO questions. (2 x 10 = 20)

1. Explain the term rheology and its application in pharmacy. Write in detail about measurement of thixotropic coefficient.
2. Explain the various theories of emulsification.
3. Enumerate the various methods to determine surface area. Explain in detail about determination of surface area using Quantasorb Instrument.

II. Write notes on: Answer any SEVEN questions. (7 x 5 = 35)

1. Optical Properties of Colloids.
2. Emulsion formulation by HLB Method.
3. Describe the effect of temperature on the rate of reaction.
4. Differentiate Lyophilic, Lyophobic and Association colloids based on their general properties.
5. Derive second order rate constant and half life.
6. Photolytic degradation and its prevention.
7. Explain the principle, working procedure, advantage and use of Ostwald viscometer.
8. Formulation of flocculated and deflocculated suspension.
9. What is true density? Explain the determination of true density by liquid displacement method.

III. Short answers on: Answer ALL questions. (10 x 2 = 20)

1. Types of viscometer with examples.
2. Edmundson Equation.
3. Specific acid-base catalysis.
4. Classify emulsion.
5. Degree of Flocculation.
6. Packing arrangement of powders.
7. Martin diameter.
8. Rheological properties of emulsion.
9. Recommend any two suitable remedy to prevent hydrolysis of medicinal drugs.
10. Define Micro emulsion.

THE TAMIL NADU DR. M.G.R. MEDICAL UNIVERSITY

[B.PHARM 0823]

**AUGUST 2023
(MARCH 2023 EXAM SESSION)**

Sub. Code: 2042

**B.PHARMACY DEGREE COURSE (SEMESTER EXAMINATIONS)
PCI Regulation 2017 – SEMESTER IV
PAPER III – PHYSICAL PHARMACEUTICS II**

Q.P. Code: 562042

Time: Three hours

Maximum: 75 Marks

I. Elaborate on: Answer any TWO questions.

(2 x 10 = 20)

1. Classify dispersed system with suitable examples. Discuss the optical and kinetic properties of colloidal dispersion.
2. Enumerate various methods to determine particle size analysis. Explain in detail about optical microscopy method.
3. Describe single point viscometer. Explain in detail about falling sphere viscometer.

II. Write notes on: Answer any SEVEN questions.

(7 x 5 = 35)

1. Write in detail about the effect of electrolytes on colloids.
2. Explain the hydrolytic decomposition and stabilisation study of medicinal agents.
3. Write a note on theories of emulsification.
4. Discuss the methodology and limitations of accelerated stability testing.
5. Explain Adsorption of Gas method for measurement of surface area.
6. Describe the pharmaceutical application of emulsion.
7. Explain the electrical method to determine particle volume.
8. Write about the sedimentation parameters of suspended particles.
9. Derive zero order rate constant and half-life.

III. Short answers on: Answer ALL questions.

(10 x 2 = 20)

1. Schulze Hardy rule.
2. Creaming and Phase inversion.
3. Angle of repose.
4. Coefficient of Viscosity.
5. Newtonian System with examples.
6. Plastic Deformation.
7. Deflocculated Suspension.
8. Gold Number.
9. Porosity.
10. Describe the effect of temperature on viscosity of liquid.

THE TAMIL NADU DR. M.G.R. MEDICAL UNIVERSITY

[B.PHARM 1223]

**DECEMBER 2023
(SEPTEMBER 2023 EXAM SESSION)**

Sub. Code: 2042

**B.PHARMACY DEGREE COURSE (SEMESTER EXAMINATIONS)
PCI Regulation 2017 – SEMESTER IV
PAPER III – PHYSICAL PHARMACEUTICS II**

Q.P. Code: 562042

Time: Three hours

Maximum: 75 Marks

I. Elaborate on: Answer any TWO questions.

(2 x 10 = 20)

1. Discuss in detail about deformation of solids.
2. Write in detail about the methods for determining surface area.
3. Discuss in detail about the determination of order of reaction and write the factors influencing the rate of reaction.

II. Write notes on: Answer any SEVEN questions.

(7 x 5 = 35)

1. Interfacial properties of suspended particles.
2. Compare the types of colloids.
3. Give an account of effect of Electrolytes in Colloids.
4. Discuss briefly about thixotropy.
5. Determination of Particle size by Coulter – counter Method.
6. Applications of Micromeritics.
7. Write brief about the stabilization study of medicinal agents.
8. Capillary viscometers.
9. Write briefly about Instability of Emulsion.

III. Short answers on: Answer ALL questions.

(10 x 2 = 20)

1. Angle of Repose.
2. Give two evaluation tests of suspension.
3. Plastic Flow.
4. Gold number.
5. Zero order reaction.
6. Rheology.
7. Sedimentation volume.
8. Surface free energy.
9. Newtonian flow.
10. Importance of half life.

B.PHARMACY DEGREE COURSE (SEMESTER EXAMINATIONS)
PCI Regulation 2017 – SEMESTER IV
PAPER III – PHYSICAL PHARMACEUTICS II

Q.P. Code: 562042

Time: Three hours

Maximum: 75 Marks

I. Elaborate on: Answer any TWO questions. (2 x 10 = 20)

1. i) Explain in detail about the theories of Emulsification.
ii) Explain instabilities of Emulsion.
2. Define viscosity. Classify the Viscometers with examples.
3. i) Explain the flow properties of powders.
ii) How will you determine the particle size by coulter – counter method with labeled diagram?

II. Write notes on: Answer any SEVEN questions. (7 x 5 = 35)

1. Discuss about the difference between the colloids.
2. Discuss the methods to determine the order of reaction.
3. Describe the shear thickening system with suitable examples.
4. Purification of Colloids.
5. Optical properties of Colloids.
6. Factors influencing degradation of Pharmaceutical products.
7. Accelerated stability testing in expiration dating of pharmaceutical formulations.
8. Determination of surface area by absorption method.
9. Specific and general acid-base catalysis.

III. Short answers on: Answer ALL questions. (10 x 2 = 20)

1. Rheogram.
2. Edmundson equation.
3. Photolysis.
4. Rheopexy.
5. Applications of colloidal system in pharmacy.
6. Schulze – Hardy rule.
7. Difference between half life and shelf life.
8. Significance of Rheology in Pharmacy.
9. Micro Emulsion.
10. Controlled flocculation.

THE TAMIL NADU DR. M.G.R. MEDICAL UNIVERSITY

[B.PHARM 1024]

**OCTOBER 2024
(SEPTEMBER 2024 EXAM SESSION)**

Sub. Code: 2042

**B. PHARMACY DEGREE COURSE (SEMESTER EXAMINATIONS)
PCI Regulation 2017 – SEMESTER IV
PAPER III – PHYSICAL PHARMACEUTICS II**

Q.P. Code: 562042

Time: Three hours

Maximum: 75 Marks

I. Elaborate on: Answer any TWO questions.

(2 x 10 = 20)

1. Define Suspension. Elaborate the formulation of suspensions and write about the theory of sedimentation.
2. What are Colloids? Classify them with examples. Describe the Electrical Properties of Colloids.
3. Define Viscosity. What are single point viscometers? Explain in detail about falling Sphere Viscometer.

II. Write notes on: Answer any SEVEN questions.

(7 x 5 = 35)

1. Define the term Micromeritics and its significance in Pharmacy.
2. Cup and Bop Viscometer.
3. Write the differences between flocculated and deflocculated suspension.
4. Accelerated stability testing in expiration dating of Pharmaceutical formulations.
5. Explain the Electrical method to Determine Particle Volume.
6. Write about Dilatant flow.
7. Pharmaceutical Application of Colloids.
8. Write about the theories of emulsification.
9. Define Photolytic Degradation and its prevention.

III. Short answers on: Answer ALL questions.

(10 x 2 = 20)

1. Thixotrophy.
2. Critical micelle concentration.
3. Overages.
4. Define pseudo, zero order reaction with example.
5. HLB scale.
6. Degree of Flocculation.
7. Donnan Membrane effect.
8. Martin diameter.
9. Gold Number.
10. Define yield value in Plastic System.

B. PHARMACY DEGREE COURSE (SEMESTER EXAMINATIONS)
PCI Regulation 2017 – SEMESTER IV
PAPER III – PHYSICAL PHARMACEUTICS II

Q.P. Code: 562042

Time: Three hours

Maximum: 75 Marks

I. Elaborate on: Answer any TWO questions. (2 x 10 = 20)

1. Define Viscosity. Classify the Viscometers with Examples.
2. Explain the methods to determine Particle Size.
3. Define and classify Colloids with suitable examples. Discuss their Optical properties.

II. Write notes on: Answer any SEVEN questions. (7 x 5 = 35)

1. Rate and order of reaction.
2. Purification of Colloids.
3. Explain the principle, working procedure, advantage and use of Ostwald viscometer.
4. Stability of suspension with sedimentation parameters.
5. Write a note on factors influencing the chemical degradation of Pharmaceutical product.
6. Classify Emulsifying agents with examples.
7. Non-Newtonian system.
8. Explain about donnan membrane effect.
9. Discuss the application of Micromeritics.

III. Short answers on: Answer ALL questions. (10 x 2 = 20)

1. Rheopexy.
2. What is protective colloid? Give any two examples.
3. Define Brownian motion.
4. Coacervation.
5. Define angle of repose.
6. Edmundson equation.
7. Recommend any two suitable remedy to prevent photolytic degradation of drugs.
8. Heckel equation.
9. Half Life.
10. Zeta Potential.
