

Undergraduate Academic Record

Physiology

**THE TN DR.M.G.R MEDICAL
UNIVERSITY
CHENNAI**

**The Tamil Nadu
Dr.M.G.R. Medical University
Chennai**

**Under Graduate Academic Record
Department of Physiology**

Thanking....

*"I thank all the illustrious faculty of Physiology
in the Medical Schools of this University for
their conscientious effort"*

Dr. Sudha Seshayyan

Preface

The new Graduate Medical Education Regulations attempts to stand on the shoulder of the contributions and the efforts of resource persons, teachers and students (past and present). It intends to carry forward the process of learning enable the Indian Medical Graduate a consummate provider of health care aligned to the evolving needs of the patients in every socio-economic setting.

The thrust in the new regulations is the continuation and evolution of thought in medical education making it more learner-centric, patient-centric, gender sensitive, outcome -oriented and environment appropriate.

The result is an outcome driven curriculum which conforms to global trends. Emphasis is made on alignment and integration of subjects both horizontally and vertically while respecting the strengths and necessity of subject-based instruction and assessment.

The importance of ethical values, responsiveness to the needs of the patient and acquisition of communication skills is underscored by providing dedicated curriculum time in the form of a longitudinal program based on Attitude, Ethics and Communication (AETCOM) competencies. Great emphasis has been placed on collaborative and inter-disciplinary teamwork, professionalism, altruism and respect in professional relationships with due sensitivity to differences in thought, social and economic position and gender.

In addition to the above, an attempt has been made to allow students from diverse educational streams and backgrounds to transition appropriately through a Foundation Course. Dedicated time has been allotted for self-directed learning and co-curricular activities. With this view in mind the log book has been designed as per the guidelines of competency based curriculum.

This Academic Record/Logbook for Undergraduate Medical Students is to be maintained by the student and is part of the learner's personal progress assessment toolkit. The learner shall present the Academic Record/Logbook to the staff facilitator / mentor at the end of all class room learning / practical sessions / integrated learning sessions / ECE / SDL / AETCOM sessions and feedback sessions as called for by the faculty facilitators / mentors. The progress shall be recorded in the various segments of the record/Logbook and signed by the facilitator / mentor.

Certificate

This is to certify that

Mr/ Ms. _____

University Registration No _____ has satisfactorily attended and completed all academic activities as assigned in this logbook as per the guidelines prescribed under the Tamil Nadu Dr. M.G.R. Medical University in subject of Physiology.

Head of Department

1. Background of the Course

i) GOAL

The broad goal of the teaching of undergraduate students in Physiology aims at providing the student comprehensive knowledge of the normal functions of the organ systems of the body to facilitate an understanding of the physiological basis of health and disease.

ii) OBJECTIVES

a) KNOWLEDGE

At the end of the course the student will be able to:

- (1) explain the normal functioning of all the organ systems and their interactions for well-co-ordinated total body function.
- (2) assess the relative contribution of each organ system to the maintenance of the milieu interior.
- (3) elucidate the physiological aspects of normal growth and development.
- (4) describe the physiological response and adaptations to environmental stresses.
- (5) list the physiological principles underlying pathogenesis and treatment of disease.

b) SKILLS

At the end of the course the student should be able to:

- (1) conduct experiments designed for study of physiological phenomena.
- (2) interpret experimental/investigative data.
- (3) distinguish between normal and abnormal data derived as a result of tests which he/she has performed and observed in the laboratory.

c) INTEGRATION

At the end of the integrated teaching the student should acquire an integrated knowledge of organ structure and function and its regulatory mechanisms.

2. Curriculum Vitae

1. Name of the Student	
2. Date of Birth	
3. Permanent Address

4. Haematology Lab Record

Note:

1. This section captures the attainment of the various competency mile-stones attained through haematology lab work.
2. The learner shall make observation in the lab and makes entries as mandated in the concerned record book
3. The record books shall be verified by the faculty facilitator periodically / at the end of each session or module and the completion of each such activity shall be recorded in this section by the learner and signed by the facilitator.
4. The end of each session shall be appended by an end of training formative assessment in the topic / session / module. eg: OSPE. Such sessional outcomes and feed for such outcomes may be suitably entered in the concerned documents.

6. Assignment Response Record

Note

1. This section includes academic mile stones attained through assignments / out of class academic work.
2. The learner shall be given an assignment based on the “Nice to know” areas of the curriculum and any other such topics as deemed necessary.
3. The learner shall submit the assignment in the offline / online module as deemed by the individual institutions, which shall be assessed and graded by the faculty facilitator.
4. The completion of such activity shall be recorded in this section by the learner and signed by the facilitator

8. Early Clinical Exposure

Objectives of Early Clinical Exposure:

The objectives of early clinical exposure of the first-year medical learners are to enable the learner to:

1. Recognize the relevance of basic sciences in diagnosis, patient care and treatment
2. Provide a context that will enhance basic science learning
3. Relate to experience of patients as a motivation to learn.
4. Recognize attitude, ethics and professionalism as integral to the doctor-patient relationship
5. Understand the socio-cultural context of diseases through the study of humanities

Elements of ECE:

The three elements of ECE are:

1. Provision of clinical correlation to basic sciences learning.
2. Provision of authentic human contact in a social or clinical context that enhances learning in the early/pre-clinical years of undergraduate education.
3. Introduction to humanities in medicine

Salient Principles:

The key principles underlying early clinical exposure are providing a clinical context and ensuring patient centricity. Early clinical exposure provides for the three key elements listed above. The clinical context can include case scenario, videos, actual patient, simulated patient etc. The presence of actual patients in every session of ECE, though not essential, is preferred. Therefore, ECE is exposure to the relevant clinical context in earlier years. It must be noted that purpose of ECE is not to prepone the conventional clinical teaching but to provide better understanding of basic sciences through a clinical context.

Note:

1. This section includes academic mile stones attained through early clinical exposure. The learner shall be assigned a specific learning objective for each session.
2. The learner shall be assigned to such ECE sessions in groups as deemed necessary by the individual institutions. The learner shall observe, interact, understand and perceive the activity. They shall record a detailed synopsis of the learning in this section. The student shall also record a detailed reflection of their experience of what was observed.
3. The completion of such activity shall be recorded in this section by the learner and signed by the facilitator.

9. Self-Directed Learning

SDL helps in empowering the student to perform an objective self-assessment of knowledge and skills, continue learning, refine existing skills and acquire new skills, to apply newly gained knowledge or skills to the care of the patient, to introspect and utilize experiences, to enhance personal and professional growth and learning, to search (including through electronic means), and critically evaluate the medical literature and apply the information in the care of the patient and to identify and select an appropriate career pathway that is professionally rewarding and personally fulfilling.

Note:

1. This section includes academic mile stones attained through self-directed learning. The learner shall be assigned a specific learning objective for each session.
2. The learner shall be given an assignment based on the “Desirable to know” areas of the curriculum and any other such topics as deemed necessary.
3. They shall record a detailed synopsis of the learning in this section. The student shall also record a list of the books/journals referred in Vancouver format.
4. The completion of such activity shall be recorded in this section by the learner and signed by the facilitator

10. Attitudes, Ethics & Communications

The “Indian Medical Graduate” (IMG) shall possess requisite knowledge, skills, attitudes, values and responsiveness, so that he or she may function appropriately and effectively *as a doctor of first contact of the community* while being globally relevant. In order to fulfill this goal, the IMG must be able to function in the following ROLES appropriately and effectively:

1. Clinician who understands and provides preventive, promotive, curative, palliative and holistic care with compassion.
2. Leader and member of the health care team and system with capabilities to collect, analyse, synthesize and communicate health data appropriately.
3. Communicator with patients, families, colleagues and community.
4. Lifelong learner committed to continuous improvement of skills and knowledge.
5. Professional, who is committed to excellence, is ethical, responsive and accountable to patients, community and profession.

Note:

1. This section includes academic mile stones attained AETCOM learning. The learner shall be assigned a specific learning objective for each session.
2. The learner shall be given an assignment based on the AETCOM topics of the curriculum.
3. They shall record a detailed synopsis of the skill learnt in this section. The student shall also record a reflection of the learning and learning process.
4. The completion of such activity shall be recorded in this section by the learner and signed by the facilitator

11. Formative Feedback Record

Note:

1. This section captures the process of formative support of the faculty mentors of the department during the learning and at the end of each section of study / module of learning.
2. The mentor shall peruse the academic performance, progression and specific academic needs of the learner.
3. The learner shall record in this section the type of formative assessment, topic for which it was done, the performance and the feedback given by the learner to the mentor on the performance, problems in learning, remedial required if any and the feedback of the mentor.
